PRESS RELEASE – For Immediate Release

6 December 2005

In a world where so much is disposable, including digital pictures, there are still the images from our past on old 8mm film, video tape and 35mm slides.

These heritage images can not only be transferred to DVD, but with **YESDVD's** Digital Scrapbook™ software, now supplied with each **YESDVD** conversion, it is easy to edit, print and email these images from the distant past.

VIDEOWAVE Pty Ltd Authorised Australian Providers of **YESVIDEO** and **YESDVD** (www.yesvideo.com.au), the leader in digital media authoring, announces major new and unique enhancement to **YESDVD**, the new **YESDVD** Digital Scrapbook™ multimedia software.

YESVIDEO HELPS MAKE PRINTS FROM VIDEOS & FILMS!

Every YesVideo DVD conversion with Digital Scrapbook™ now includes a selection of JPEG images automatically extracted from the video, as well as the ability to edit the video and images.

Just click and print!

YESDVD with Digital Scrapbook™ multimedia software plays like a Hollywood movie DVD when played in a DVD player, and also performs as an easy-to-use video and photo editing application when run on a PC.

With their video clips and photos already integrated into the Digital Scrapbook™ toolset, consumers can immediately edit, create, and share their memories and prints. Editing functions include cropping, rotating, and red-eye reduction, as well as easy selection of video clips. The final creation made with Digital Scrapbook™ can easily be converted to .WMV format for emailing to friends and family, or for burning a new DVD.

Please visit www.yesvideo.com.au for full prices and specifications.

Our expert and friendly staff are available to give help and advice on 1300 937383 - 1300 **YESDVD**

"The **YESDVD** Digital Scrapbook™ meets the growing demand by consumers who want to easily edit their video, capture and print still images from their video, even add stored still pictures, personal music, and special effects into their video," said Bernhard Kirschner, director of VideoWave. "We believe that our customers want to store and share events through both email and prints by creating customised, multimedia scrapbooks from their digital pictures and video."

Digital Scrapbook™ is significantly easy to use video and photo editing software and has unique features in that:

-- With Digital Scrapbook™ as companion software on a **YESDVD**, all forms of videotape, movie film, 35mm slides, photo prints, and digital images that have been transferred to a **YESDVD** can now be easily edited and customised using Digital Scrapbook™.

-- Digital Scrapbook™ has the video content intelligently chaptered and loaded in its Library, making the video ready to edit. In the process of creating the finished **YESDVD**, the "heavy lifting" of transcoding the video into MPEG2 files has already been performed.

-- Digital Scrapbook™ enables consumers to easily capture, manipulate and print still images from their video footage.

-- Digital Scrapbook™ includes a folder on the DVD of JPEG images consisting of each of the 54 chapter marks, as well as images selected from the video that can be printed yourself or at your local photo store.

-- Digital Scrapbook™ includes an easy-to-use graphical user interface, with drag-and-drop and point-and-click editing operation.

Pricing and Availability

Available free with the purchase of a **YESDVD** conversion, with a suggested retail price of \$59.95 per two hours of tape conversion to DVD, the **YESDVD** Digital Scrapbook multimedia software adds great value to a **YESDVD** digital transfer order. Digital Scrapbook™ is available from over 400 stores Australia wide when converting tape, film, or slides to **YESDVD** beginning in December 2005.

To find the nearest store see www.yesvideo.com.au or phone 1300 937 383 (1300 **YESDVD**).
